SCIENCE FICTION

Here, Science-Fiction is approached in its most literal sense. First, the projection of innovations that our scientists think about provides a fertile background for the plot and characters. Then, from the very first chapter, FLOW plunges the spectator into a dystopian future where technology remains the last bulwark against the extinction of humanity.

- Biotransfer is the basis of the organization of the Traced Citizens. They are evaluated up to their state of health. Anticipated medical visits at the slightest biometric anomaly lead to a compulsory and rigorously controlled medical treatment.

- The virtual immersion that dives MUSIC WAR candidates into completely fantastic worlds, also allows residents to enjoy digital vacations. A new way to travel as a family without moving for a people forced to live in isolation.

- Cell phones now become the TOOLS. Much more than an object of communication, the TOOL reflects a personality. An infinity of models exist.

- To build this company, mankind has mastered nuclear fusion. Thanks to the "combination" of Helium 3 and Deuterium, phenomenal quantities of energy are produced without emitting any waste. A little late, but Green Energy is there.

- Cloning is primarily approached for its benefits. Cloning organs saves lives and synthetic food allows people to feed themselves properly. In urban zoos, even animal species extinct because of the climate have been resurrected. The following chapters will reveal that human cloning also becomes a resource, through strange slaves on the Spheres (the DEOÏDS) and through the hero's hidden origins.

ADVERTISEMENTS

For a more complete immersion, each episode of this first season is interrupted by an imaginative advertisement for a product of the future.

Advertising is the mirror of an age. It is not uncommon today to react to an old ad praising the benefits of a fulfilled woman's life in order to praise a washing powder. The reverse is also true, and the future of advertising might greatly surprise us.

DEMO-MOVIE

Shot three years ago now, my first ten-minute film goes with this presentation. Working on this project allowed me both to understand the problems of filming before starting this type of writing, and to create the illustrations that give color to this file.

Consistency with the story remained intact and the rendering reflects the points implied in this presentation: water rationing, intrusion of those in charge into the intimacy of a bathroom or simply the contrast between worlds.

If I produced this movie on my own, it was all possible thanks to the great team who immediately believed in the project, so many people never counted the hours.

MUSIC PLAYLIST

How does one add revenue with a derivative product directly related to the story ?

Heroes participating in a cultural show will have to perform songs to win. Exploiting these fictitious artists on other broadcast channels during the off-seasons, would allow us to maintain the public eye through the release of new titles and video clips. The idea is to create additional revenue from the first annual broadcast break. The recordings of the titles and clips will be made in parallel with the shooting days to take advantage of the actors and technical means available, which will considerably limit production costs. With two titles per artist, around a dozen contents will be added to the original soundtracks that can be released during the filming periods...

Together with a composer, we tried to create a musical identity and an artistic universe for each of the candidates for MUSIC WAR. Here, the actors of this demo-movie recorded their own vocal parts. Have a good listening !

WEBSITE BIBLE

Since I can't offer a scenario from a literary bestseller , I wrote the whole background of the series in a complete file. It includes a general introduction explaining how we got here. This is followed by an overview of the Cities, the Spheres, the Horscit people and the Shaman mutants, the plans of the Resistance and the politics of the Trident. For the advertisements of the first season, a dozen products of the future were imagined alongside the innovations of this century.

The largest part concerns the characters. For more than fifteen, we know their past, their role in the story, the particularities of their TOOLS with the reference that inspires each of their stories.

Greek, Shinto and Mesopotamian mythologies interact around the famous personalities of our century in this tribute to our history. The organization of the seasons and their content can thus be adapted without departing from the basic concepts.

THE FLOW

When the time came to find a title for this epic, I discovered the research on Creativity by psychology professor Mihaly Csikszentmihalyi. His book "FLOW", suddenly clarified this vast subject with concrete examples allowing me to singularize and quantify the notion of talent in the story.

In the famous bestseller, the "FLOW" occurs at those moments in life when the focus of an individual's attention is on the accomplishment of a specific task. The person is then invested with unlimited motivation and energy to live an "optimal experience".

The FLOW of our history is quantified in coefficients. This fragile and rebuilding society depends on the minds of tomorrow and on the involvement of citizens to accomplish their tasks.Monitoring the creative potential is a priority. Orienting individuals as early as possible towards concerns appropriate to their abilities improves the quality of work and the propensity for innovation.

Our heroes stand out from the rest of the population by their ability to do everything possible to achieve their goal.

Selected at MUSIC WAR for their superior FLOW Coefficient, each one will prove to the Spherians that creativity enables them to achieve much more than just entertaining.
